

Student Guide

A simple guide to the student portal

School Management Platform

Student Guide

A simple guide to using your student portal.

Login

1. Open the school's system web address.
2. Click **Sign in**.
3. Type the **email address** and **password** your school gave you.
4. Click **Sign in**.
5. You'll land on your **Dashboard**.

Trouble logging in? Use **Forgot password?** on the sign-in page. Still stuck? Ask your school office.

Dashboard

Your dashboard shows your name, admission number, current class, session and term, plus quick links into **Results**, **Attendance**, **Assignments**, and **Timetable**. Across the top of every portal page you'll also see tabs for every section you have access to (only sections your school has switched on will appear).

Timetable

Click the **Timetable** tab to see your weekly class schedule (only shown if your school uses this feature).

Assignments

Click the **Assignments** tab to see homework set for your class — subject, due date, and whether your teacher has marked it submitted, late, or exempt.

Assignment submission

There is no file-upload button in this version — your teacher marks your submission status themselves once you've handed in your work the way your school normally collects it (in person, etc.). The **Assignments** tab is where you check that status, not where you submit files.

Learning materials

Click the **Learning Materials** tab to see files (PDF, images, audio) your teachers have shared with your class. Click one to view or download it.

Attendance

Click the **Attendance** tab to see your attendance record — how many days you were present, absent, or late this term.

Results

Click the **Results** tab to see your published results by term — subject scores, grade, and (if your school uses it) your class position. **You will only ever see a term's results after your school has published them** — if a term doesn't appear yet, it's simply not ready.

Report cards

Click the **Report cards** tab to view your full, formatted report card for a published term — the same one your school prints. Use your browser's print/save option to keep a copy.

CBT examinations

Purpose: Sit an online exam your teacher has scheduled for your class.

Steps: 1. Click the **CBT** tab. You'll see every exam for your class, marked **Open** (available now) or **Completed** (you've already taken it). 2. Click an open exam → you'll see its subject, number of questions, duration, and the time window it's available in → click to begin. 3. Once you start, a countdown timer begins at the top of the screen — **watch it**; the exam auto-submits itself the moment time runs out, even if you're not finished. 4. Numbered circles let you jump straight to any question — a circle turns green once you've answered it, so you can see at a glance what's left. 5. Pick your answer for each question — **your answer is saved automatically the moment you select it**, you don't need to click a separate save button per question. 6. Use **Previous/Next** to move between questions, or click a number to jump directly. 7. When ready, click **Submit examination**. If anything is unanswered, you'll be warned and asked to confirm before it submits.

Important: - You can only attempt each exam **once**. - You cannot go back and open the exam again once you've submitted (or once the timer runs out). - The system — never your browser — decides your score. You cannot see the correct answers to any question during or after the exam.

Released CBT results

Your score appears on the **CBT** tab / the exam's own result page — **but only once your school releases it**. Some exams release results the moment you submit; others release on a scheduled date your teacher sets. If your result isn't showing yet, it means it hasn't been released yet — check back

later, or ask your teacher when it will be.

Fees

Click the **Fees** tab to see what's been charged to you, what's been paid, and what's still outstanding. If your school accepts online payment and you owe a balance, you'll see a **Pay online** button — click it, enter an amount, and complete payment on the secure payment page that opens. You'll be brought back automatically once it's confirmed.

Profile / security

1. Click your name (top-right) → **My Profile / Account settings** to see your details.
2. To change your password, use the password section there.
3. Click your name → **Sign out** when you're done, especially on a shared computer.

A note on privacy: you only ever see your own information — never another student's results, attendance, or fees.
