

Training Handover Checklist

For the trainer to complete with a newly onboarded school

School Management Platform

Training Handover Checklist

For the salesperson/trainer to work through with a newly onboarded school. Tick each item only once you've actually watched it happen, not just explained it. Cross-reference the relevant manual for detail on any item.

School name: _____ Date: _____ Trainer: _____ School contact: _____

Role training completed

- ☐ **School Admin trained** — walked through [School Administrator Manual](#) sections 1–14 at minimum (login, dashboard, settings, academic setup, module activation).
- ☐ **Teacher trained** — walked through the [Teacher Manual](#), with at least one teacher taking attendance and entering a real score themselves.
- ☐ **Accountant trained** — walked through the [Bursar Manual](#), with the bursar recording a real payment themselves.
- ☐ **Parent onboarding explained** — School Admin knows how to link a guardian to a student and assign the Parent role; a parent's login shown working.
- ☐ **Student onboarding explained** — School Admin knows how to link a student's account and assign the Student role; a student's login shown working.

Configuration completed

- ☐ **School settings configured** — profile, branding (logo), regional preferences saved.
- ☐ **Academic setup completed** — at least one session (marked current), at least one term, levels, arms (if used), and subjects created; subjects offered at the right levels.
- ☐ **Modules activated** — reviewed the full module list together; confirmed which are on/off matches what the school actually wants to use.
- ☐ **Users created** — School Admin knows how to add a member and assign a role from [Members](#) → [Add member](#).
- ☐ **Students imported/created** — at least a representative sample of real students added and enrolled in their classes.
- ☐ **Teachers created** — real teachers added, with their teaching assignments (class + subject) set.
- ☐ **Fees configured** — at least one fee category and fee structure created.

Workflows tested end-to-end

- ☐ **Timetable configured** (if the school uses it) — at least one class's weekly schedule built and published.
- ☐ **Attendance tested** — a real register created, marked, and submitted by a Teacher account (not just School Admin).
- ☐ **Results workflow tested** — an assessment created, scored, published, locked; a result run compiled through to Publish/Lock; a report card opened and confirmed it looks right.
- ☐ **Parent Portal tested** — logged in as (or watched) a real parent account; confirmed they see their own child(ren) and nothing else.
- ☐ **Student Portal tested** — logged in as (or watched) a real student account; confirmed they see their own data and nothing else.
- ☐ **Payment workflow tested** — a manual payment recorded by the bursar; if Paystack is configured, one online payment tested end-to-end.
- ☐ **CBT tested** (if the school uses it) — one exam created, scheduled, and sat by a test student account; result release behaviour (immediate or scheduled) confirmed to work as expected.
- ☐ **Reports tested** — the school has opened the Reports area and confirmed real numbers match what they entered.

Handover confirmed

- ☐ **School understands support process** — they know who to contact and how, if something goes wrong or they have a question.
- ☐ **School received user manuals** — links or copies of the [School Administrator](#), [Teacher](#), [Bursar](#), [Parent](#), and [Student](#) manuals handed over.
- ☐ **School completed acceptance checklist** — the school's own representative has signed off that the system does what was demonstrated and agreed.
